

JOHN KENT BLANCAFLOR

Full-Stack Web Developer — BSIT Student

Tabaco City, Albay, Philippines +63 991 815 4335 johnkenttblancaflor@gmail.com github.com/yobb-bit

01 — SUMMARY

Second-year BSIT student building web applications with React, Next.js, and TypeScript. Self-taught through building — ships deployed, working products including a PWA ticketing system and a marketplace platform, both backed by Supabase with Row Level Security. Brings hands-on experience in customer operations and supplier coordination, with a strong work ethic and reliable availability.

02 — PROJECTS

PILA — Digital Ticketing System

Next.js · TypeScript · Supabase

pila-silk.vercel.app · github.com/yobb-bit/pila

- Built a full ticketing platform with authentication, user registration, and role-based onboarding flows.
- Integrated Supabase for Postgres, Auth, and Row Level Security; routes protected via Next.js middleware.
- Added a PWA layer with next-t-pwa and QR code generation for ticket verification.
- Built an admin panel and notification system; data visualised with Recharts.

Pisoblox — Marketplace Platform

Next.js · TypeScript · Supabase

pisoblox.vercel.app · github.com/yobb-bit/pisoblox

- Developed a listings marketplace with create, browse, and sold-state tracking for user accounts.
- Designed and implemented the Postgres schema in Supabase with Row Level Security enabled, enforcing per-user data access.
- Implemented auth, user profiles, and an application workflow with a protected admin area.
- Styled with Tailwind CSS and Radix UI primitives; used Framer Motion for interface transitions.

linkd-design.vercel.app ·

github.com/yobb-bit/portYob

- Designed and built this portfolio using the App Router, with a custom monochrome design system.
- Implemented light and dark theming with persisted preference and a system-following default.
- Used IntersectionObserver for scroll-triggered reveal animations and added a PWA-ready icon set.

03 — SKILLS

Languages — TypeScript, JavaScript, Java, HTML, CSS, SQL

Frameworks & Libraries — Next.js (App Router), React, Tailwind CSS, Radix UI, Framer Motion, Recharts, Supabase JS

Backend & Data — Supabase (Postgres, Auth, Row Level Security), REST APIs, schema design

Tools & Workflow — Git & GitHub, Vercel, PWA (next-pwa), Figma, VS Code, npm

Professional — Supplier sourcing & vendor coordination, customer support, order fulfillment, Discord community management

04 — EXPERIENCE

Bloxystore.com

- Delivered digital in-game items to customers and managed order fulfillment for the shop's product catalogue.
- Provided responsive customer support, maintaining fast turnaround during peak US business hours.

Independent e-Commerce Shop (eBay)

- Handled customer communication and order fulfillment during peak buying hours.
- Sourced additional suppliers to meet rising demand, connecting the shop with bulk, low-cost sellers.
- Supported daily operations when the shop owner was unavailable.

Self-directed

- Built and deployed multiple full-stack web applications — see Projects above.
- Maintained 14 repositories on GitHub spanning TypeScript, JavaScript, and Java.

05 — EDUCATION

Philippines
